

LOUIS NICHOLSON-PALLETT

louis.pallett@outlook.com
Personal site: louis-nicholson-pallett.dev

Bristol
BS5 8RU

I am a resourceful and accomplished professional with over five years of experience in customer-facing, administrative, and high-pressure roles. Over the last two years, I have pivoted towards a career in technology by studying software and web development while working full-time. My training includes *The Odin Project's* full-stack web development course (Node.js, React, and MongoDB) and Harvard University's *CS50X: Introduction to Computer Science* (C and Python).

I am seeking a role that allow me to combine my technical and problem-solving skills with my strong organizational abilities. My personal site features detailed information about my technical expertise and portfolio of projects, including a full-stack tennis tournament web application.

Projects

Creating projects has been a key part of my learning of web development and I learned through that process. My largest project is **LowPal Tennis Tournament**, a full-stack web application with real-world usage – it allows a club to run a tennis tournament through allowing users to sign up, view matches, and update match results, as well as automating the process of assigning players to teams and matches through a 'unique' server-side algorithm.

You can read more about this project and others on my personal site. You'll find a video demonstration there, but if you would like to log into a 'dummy' account, please contact me and I can provide you with login details.

Key Skills

Technical Skills

- Proficiency in JavaScript (Node.js, React) with knowledge of Python, Java, and C.
- Experience with front-end and back-end development, including RESTful APIs and MongoDB.
- Knowledge of version control systems, including Git (branching, merging, rebasing).
- Comfortable working with Windows, macOS, and Linux distributions (Ubuntu, Fedora, Mint).
- Experience with tools such as VS Code, PowerShell, Microsoft Office (Access, Excel, SharePoint).

Soft Skills

- Strong problem-solving skills, capable of breaking down complex challenges into manageable tasks.
- Exceptional communication skills, including experience delivering presentations and training.
- Effective team collaboration in both professional and project-based settings.
- Proven time-management and organizational skills in deadline-driven environments.

Professional Experience

Editorial Assistant

- Coordinated manuscript production and negotiated contracts with authors.
- Managed book review processes and maintained consistent
