

LOUIS NICHOLSON-PALLETT

louis.pallett@outlook.com

Bristol
BS5 8RU

I am a resourceful and accomplished Editorial Assistant with over five years of experience working in administrative, customer-facing, target-driven, and high demanding roles. Over the last two years, I have been studying towards a career change in a IT/software related role – completing, whilst working full-time, *The Odin Project's* course in web development (full-stack with NodeJS and MongoDB) and Harvard University's *CS50X: Introduction to Computer Science* (C and Python). My personal website (louis-nicholson-pallett.netlify.app/) contains lots information about my knowledge and experience of programming languages, frameworks, compilers, and libraries, as well as some featured projects to show this knowledge in practice.

Projects

Creating projects has been a key part of my learning of web development and I learned through that process. My largest project is **LowPal Tennis Tournament**, a fullstack web application with real-world usage – it allows a club to run a tennis tournament through allowing users to sign up, view matches, and update match results, as well as automating the process of assigning players to teams and matches through a 'unique' server-side algorithm.

You can read more about this project and others on my personal website (louis-nicholson-pallett.netlify.app/).

Soft and Technical Skills

- Exceptional written and oral skills, with experience in both academic and professional environments, including at conferences and technical training for new colleagues.
- Knowledge of and experience with Windows, Mac, and Linux (Ubuntu, Fedora, and Mint).
- Experience operating Windows programmes: Office (Access, Excel, PowerPoint, SharePoint, Word), PowerShell, Visual Studio Code. A full list of programming languages can be found on my personal website.
- Knowledge of Git, including working with branches, merging, and rebasing.
- Working closely and collaborately with teams on multiple projects.
